Telemedicine Adoption Among Rural Clinics After 2020

Ingrid Achebe-Novak
Department of Imaginary Studies, Fictional University

Abstract. Using survey data from 1,150 fictional rural clinics, we document the adoption of remote consultations after 2020. Adoption was highest in clinics with existing electronic records and lowest where broadband coverage was poor.

Keywords: telemedicine, remote consultation, rural health, adoption

Kurgusal örnek veri. AI Agents Masterclass (@selma.builds) için üretildi; gerçek bir yayın değildir.

Method

Logistic regression of adoption on clinic characteristics.

Results

Clinics with broadband were 2.4 times more likely to offer remote consultations.

Conclusion

Adoption was highest in clinics with existing electronic records and lowest where broadband coverage was poor.
