Remote Work and Housing Prices in Suburban Rings

Priya Halvorsen
Department of Imaginary Studies, Fictional University

Abstract. This paper estimates how the rise of remote work changed housing prices across suburban rings of 40 fictional metropolitan areas. Prices in the outer ring grew 7 percentage points faster than in city centres between 2020 and 2022.

Keywords: remote work, housing, urban economics, donut effect

Kurgusal örnek veri. AI Agents Masterclass (@selma.builds) için üretildi; gerçek bir yayın değildir.

Method

Repeat-sales price indices are combined with commuting-zone level remote-work shares.

Results

A 10 point higher remote-work share is associated with 3.1 percent higher outer-ring prices.

Conclusion

Prices in the outer ring grew 7 percentage points faster than in city centres between 2020 and 2022.
