Open-Plan Office Acoustics and Noise Complaints

Oskar Pellegrini
Department of Imaginary Studies, Fictional University

Abstract. Sound level measurements in 15 fictional open-plan offices are compared with the number of noise complaints filed with facility management. Complaints rise sharply above 55 dB(A).

Keywords: open-plan office, acoustics, noise, facility management

Kurgusal örnek veri. AI Agents Masterclass (@selma.builds) için üretildi; gerçek bir yayın değildir.

Method

Continuous sound level logging over 30 working days per office.

Results

Each 5 dB(A) increase is associated with 1.8 more complaints per 100 staff per month.

Conclusion

Complaints rise sharply above 55 dB(A).
