Four-Day Hybrid Schedules and Task Completion in Consulting Teams

Daniel Moreau-Lindqvist, Hana Sato, Kofi Brennan

Department of Imaginary Studies, Fictional University

Abstract. We report a cluster-randomised trial in 64 consulting teams of a fictional firm, comparing a four-day hybrid schedule (two office days, two home days) with a five-day office schedule. Billable task completion per consultant did not differ, while self-reported focus time rose by 18 percent in hybrid teams.

Keywords: hybrid work, consulting, randomised trial, task completion

Kurgusal örnek veri. AI Agents Masterclass (@selma.builds) için üretildi; gerçek bir yayın değildir.

Method

Teams were randomised; productivity measured as completed billable tasks per week.

Results

Difference in task completion: +0.3 tasks per week (95 percent CI -0.4 to 1.0).

Conclusion

Billable task completion per consultant did not differ, while self-reported focus time rose by 18 percent in hybrid teams.
